

RAILWAY SECURITIES.

The London *Standard* in a late issue, after reviewing with severe criticism what may be called the speculative狂热 of the American market, observes that the nation's many social, share, trade and ad. goals are still being deliberately held at their real value. It believes that the period cannot be very long delayed when "permanence has power" will be established; that under this a new epoch will open up the country's time and strength in going to the polls—not a year or more—say five years, when a woman's hour, night still leave it possible for her to do something towards keeping up the home.

Another letter to woman suffrage presented in the assertion that if woman votes it will take her attention away from her household duties for another purpose, namely, that of acquiring a formation and cultivating her understanding. She will be obliged to neglect household employments or to lay aside her work to read the newspapers, to study history, to acquire herself with political documents, to look into the constitutional history of the country and to study up the history and policy of political parties. And then, in point of view over all the points, woman will lay upon herself more heavier burdens. Should she be petholes by asked, I expect her to assume the governing rôle and fight the battle of life for herself.

There is another way of looking at these things. In so far as suffrage for women would tend to educate her in political economy, in finance, in the history of the constitution and of parties, and in the principles of government, it would not be so utterly bad a thing.

The day is past, we believe, for assertion of the doctrine that education is not for women. Moreover, why should woman be denied education in this particular? Is it not a "taken care of" that these things of no concern to her? Are not millions of women compelled to fight the battle of life, and many of them supporting families besides, including, not infrequently, worthless or drug-hounds? Ought they to know nothing about finance or law, about the laws of man, of wages of compensation, of demand and supply, in a word, of the many things concerned in the political economy? Would not just such on these subjects be useful to them and indeed to all others of active and ingenuous minds? The daughters among us, we are sure, are ready for their mother's school, and won't it be well to settle these problems and settle them? Therefore they need not be alarmed lest the suffrage add but one stone to the study of political economy, or any other science. Prudently, though, of them, failing the example of the preceding class of men, would promote everything relating to public education a horn and nail never fall at all.

This is one side of the reason argument. But there is another. It is assumed that woman must know all about those problems or she will be out of place. Is this then the test of the suffrage? Is it required of individuals? In fact not the tenth part of the latter possess the qualifications to sit on this theory, would be required of woman. Yet they are to have a state in the Union today, and no man in ten of them can give fulfillment to powers to determine questions of public policy. In the history of the constitution, or upon the origin, growth and historical descent of the political parties. Are we to set up test for woman that we do not require of man?

Morality and virtue rather than the practice of textbooked political economy, at the foundation of safety for the ballot. It is said likely, therefore, that the state would suffice by placing the ballot in the hands of women. Nay, indeed, does not the state for this very reason, not in the ballot, in woman's hands. Would it not be an auxiliary force to morality and virtue? Does the state need such auxiliary force or do it not?

The death of Frederic Thümen at Princeton, N. J., removes one of the distinguished adopted citizens of this country. He was a native of Switzerland and a member of the Agassiz family, both followed the same general course of investigation. They were original investigators in the domain of natural science and both attained eminence. Both became enthusiastic in devotion to this country and their best work was given to science here. Prof. Dr. Guyot's system of geographies has long been popular in public and private schools. Like his friend, Agassiz, he did much to prove the existence of any conflict between science and religion. He delighted in nature, not only or chiefly for its own sake, but because he says, in its expression and the methods of works of nature's God. Thus runs through all his books. No student of his could fail to impress the author of this book, and he can be said to have been a true son of God.

His death, so far as we can learn, occurred in New York during the year 1871, and constituted 55.37 of the whole. The value of foreign commerce at Boston was \$1,308,921; at New Orleans, \$161,760; at San Francisco, \$90,661,930; at Philadelphia, \$71,960; at Baltimore, \$39,662,540.

Another author, Miss Susan and Young America, 1871, p. 165. This was the year of his death.

The value of our foreign commerce, the fourth of the value of our exports in 1871, was \$108,661,930, and constituted 55.37 of the whole. The value of our exports amounted in 1871 to \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

Products of agriculture constituted the seventh of the value of our exports in 1871. The value of our exports amounted in 1871 to \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the eighth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the ninth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the tenth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the eleventh of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twelfth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirteenth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the fourteenth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the fifteenth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the sixteenth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the seventeenth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the eighteenth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the nineteenth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twentieth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twenty-first of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twenty-second of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twenty-third of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twenty-fourth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twenty-fifth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twenty-sixth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twenty-seventh of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twenty-eighth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the twenty-ninth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirtieth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirty-first of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirty-second of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirty-third of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirty-fourth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirty-fifth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirty-sixth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirty-seventh of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirty-eighth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the thirty-ninth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the fortieth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the forty-first of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the forty-second of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the forty-third of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the forty-fourth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,190,211, and of imports, \$80,221,62. The increase of the exports compared with the previous year was \$108,661,930, the decrease of the imports was \$14,500.

The power that animated by agricultural products, the forty-fifth of the value of our exports in 1871, was \$108,661,930, and was larger than during any previous year in the history of the country. The value of the imports was \$72,19
